

# VOYAGER™

## Large Office Laminate

A3 Voyager™

Item No. 5704501

Automatically programs settings for pouch and document

## THE VOYAGER IS THE ULTIMATE HIGH-PERFORMANCE LAMINATOR FOR DAILY USE IN THE LARGE OFFICE

- 4-roller system for superior laminating results on documents up to 250 microns thick
- Exclusive AutoLam™ technology self-adjusts to optimal laminating setting for the pouch and document you use
- Advanced belt drive system guides document through laminator for efficient, jam-free performance
- Laminator saves time by self-adjusting to pouch size and document thickness - no more waiting for machine to cool down or heat up
- LCD touch panel makes laminating easy and trouble-free
- HeatGuard™ Technology - double walled insulation keeps heat inside so laminator is comfortable to touch
- Quick heat-up time - ready in just 4 minutes
- Green light and audible beep indicate when machine is ready to laminate
- Fast and easy to use - laminates an A4 document in about 30 seconds
- Auto Reverse mode detects misfeeds or overloads and reverses document flow for easy removal
- Cleaning sensors detect dirt or glue and notify user to clean the laminator
- Unique clam shell design makes machine easy to access for cleaning, maintenance, or misfeed removal
- Auto shut-off prevents overheating when not in use
- Includes a laminating starter kit (contents: 80 microns A4 pouches)
- 2 year warranty

LCD touch panel makes laminating easy and troublefree

# VOYAGER™

IT'S SO SMART IT WON'T LET YOU MAKE A MISTAKE

## HERE ARE SOME VOYAGER DEMONSTRATIONS THAT ARE SURE TO IMPRESS YOUR CUSTOMER!

### TRIMMING DEMO

**BE SURE TO DEMO THIS FIRST BEFORE YOU LAMINATE TO PREVENT HAVING TO WAIT FOR THE MACHINE TO COOL DOWN**

- Turn the laminator on
- Select OPEN in the start-up menu using the navigating buttons and confirm your selection with the OK button

*Note: If the machine has been laminating it might need to cool down. (This can take up to 30 minutes)*

- When the laminator is ready to open a picture of the laminator open will display on the LCD screen and the laminator will beep

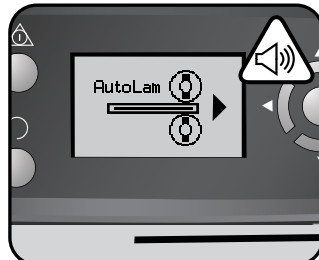

- Move the lever on each side of the machine backwards to open the cover
- Open the cover with both hands

- Pull the cam levers forward to release the internal mechanism and lift up

- To clean residue off the laminator use Fellowes Laminator wipes
- When closing the laminator please remember to re-secure the mechanism with the cam levers before closing the cover

### AUTOLAM DEMOS

#### CORE STEPS

- Turn the laminator on
- Select the standby button on the control panel to turn the LCD screen on
- The laminator will automatically start in AutoLam mode and begin warm-up if no other selection is chosen within 5 seconds
- When the laminator beeps and the LED turns green it's ready, there are no settings to choose. The laminator will automatically adapt to your pouch and document
- Place the pouch into the laminator. Be sure the sealed edge is inserted first

#### LAMINATING DIFFERENT MICRON THICKNESSES WITHOUT WAITING FOR THE MACHINE TO HEAT-UP OR COOL DOWN

- Complete CORE steps first then....
- Laminate different size pouches from 80 microns to 250 microns to demonstrate how AutoLam adapts to the pouch and doesn't require the machine to heat-up or cool-down
- Be sure the sealed edge is inserted in first

#### LAMINATING ITEMS OF DIFFERENT THICKNESS IN ONE POUCH

- Complete CORE steps first then....
- Place a document into a pouch and then place a business card on top of it to show how the Voyager can laminate different document thicknesses in the same pouch
- Be sure the sealed edge is inserted in first
